Order Fulfillment + Production

Configuration Specialists

With two decades of experience solutioning in the SAP Variant Configurator (VC), Internet Product Configurator (IPC), and Solution Sales Configurator (SSC), eLogic understands complex manufacturers' configuration needs on the SAP platform.

Our team has worked with every SAP configurator and commerce solution since R/3 version 3.1 and ITS.

We also work with SAP's product teams to help shape the next generation of configuration in S/4HANA and CPQ.

eLogic is the sole SAP partner contributing to the Advanced Variant Configurator (AVC) Customer Influence Council since it was started in 2015. We regularly explain the vast solution challenges faced by complex manufacturers, and we have a front row seat to the latest innovations that SAP is continually adding.

Fully Leverage SAP ECC or S/4HANA to Sell and Fulfill your CTO and ETO Products & Services

Achieve the expected ROI with less manual effort and system customization by leveraging industry best practices with advanced functionality in your SAP ECC or S/4HANA systems that support your configure-to-order and engineer-to-order products and services.

We unleash the power of SAP configurators to enable complex manufacturers to manage CTO and ETO in their enterprise. It's our mission to help you maximize your SAP ECC or S/4HANA system investment. When you engage with eLogic, you get strategy and solutioning with unparalleled expertise on your industry and the SAP configurator marketplace, and we share your voice with SAP to influence the SAP roadmap and customer alignment to it.

WHERE ELOGIC EXCELS

Variant Configuration

Sell and manufacture products, services, and systems with a wide range of selectable features and options.

Service Management

Plan and perform services and warranty or ad hoc repairs for equipment installed in customer locations.

Project Sytems
